Mitchell Golf Interactive PDF Catalog

Introduction of our Interactive PDF Catalog was a big success in 2015. It has received accolades from many of our customers claiming it's easier to use than a printed version.

Each catalog page has product feature information, pricing and a link to our secure website. It makes shopping more convenient in our new digital world.

With our easy navigation by product category and the interactive link, it is real simple to shop the catalog for specific items, then click the link to our website page to make the purchase.

We have the ability to update our catalog, as needed keeping you current with product information and pricing, plus specials and discounts.

Our newest revision will be emailed each time it's published. Please save it to your desktop for easy access.

Enjoy Using Our
2019 Interactive
PDF Catalog

Address: 1001 Industrial Blvd, Albion, MI 49224

Mitchell® TourGauge® Putter Machines Are Number One On Tour Worldwide & Will Register, Clamp & Bend All Putters That Meet USGA Approved Designs Per Appendix II Of The Rules Book.

Mitchell® TourGauge® Putter Machines are CNC machined utilizing a precision ground slide-bearing gauge assembly available with an analog scale or digital LED display that moves from center of the machine to register against the putter shaft. This ensures 100% accuracy with zero tolerance while adjusting for hosel position regardless of offset, non-offset or face progression of all right- and left-hand models: blades, cavity backs and mallets, including today's latest designs of oversized mallet heads.

Included With Machine:

- » 19" Adjustable Putter Aluminum Bending Bar
- » 16" Putter Shaft Bending Bar
- » Putter Nylon Clamp
- » Oversized Mallet Clamp
- » Mounting Hardware
- » Instruction Manual - Online
- » Putter Spec Charts
- » 27' Roll Face Fixture Tape
- » AC Transformer (Digital Model Only)

Shown w/ Driver

Signature
STEELCLUB® ANGLE MACHINE

**One Machine Bends
Irons, Hybrids & Metal Woods
Right- & Left-Hand**

The Steelclub® Signature Angle Machine is the latest evolution of the world's best bending machine and is our best seller. It uses Dual Precision Gauges for measuring and bending loft/lie angles on irons and face/lie angles on hybrids and metal woods. It doubles as a specification gauge that accurately measures loft, lie and face angles simultaneously with its patented measuring gauges.

**Use As Spec Gauge For
Adjustable Tip Clubs**

The new self-adjusting drivers, fairway metals and hybrids can be checked to record the actual adjustments made by repositioning the adapter. Not all company adjustments are the same. Use the Steelclub® Signature Angle Machine to learn just how much of an adjustment is being made.

STEELCLUB®
IRONS ANGLE MACHINE

#SAMI-FMS

Steelclub® and TourGauge® Irons Angle Machines are precision gauges for measuring and bending loft/lie angles on all irons. A complete set of irons can be measured and adjusted in less than 10 minutes. They clamp all iron sole radiuses and wide top line designs. They easily bend 17-4 and 431 cast stainless steel and forged carbon steel heads, right- and left-hand. Technicians measure and bend in the same fixture, which eliminates operator error when using other measuring devices.

STEELCLUB® GRAPHITE SHAFT PULLERS

Steelclub® Graphite Shaft Pullers are CNC machined making them precision tools. The Selectable Hosel Stop, a Mitchell innovation, accommodates all shaft tip diameters and is the best in the industry. The interchangeable rubber shaft clamp is great for proper clamping pressure. The T-Handle turning is convenient and efficient saving time pulling graphite shafts.

- » Great For Heavy Volume Use
- » Precision CNC Machined
- » Low Friction Bearing Extracting Rod
- » Balanced Speed Handle
- » Bench Or Vise Mount
- » 2-1/2" Rubber Clamps
- » T-Handle Top Clamp
- » Selectable .335" - .500" Hosel Stop

Best Model Available!

Club Repair Vac

Request Quote Now!

#BV

Now in a smaller space-saving footprint! Our Mitchell Golf Club Repair Vac delivers the same high volume, high-pressure air movement system: 1200cf per minute of down-draft vacuum that eliminates almost all the shaft dust you create. Dust is pulled through a filtration system of two specially coated filters (included). These filters capture dust particulates as small as 8-micron in size. These filters are required to ensure the vacuum pressure needed to work sufficiently.

Mitchell® Putter Ruler

\$24.99
#PR

Measures Right- &
Left-Hand Putters Up
To 48"

This unique ruler measures all putters directly down the shaft plane. This is the most accepted method for putter length measurements. Locate the 2 dowel pins on the shaft and position putter in its lie angle position with grip in center of ruler. Read putter length at end of grip. Measures right- and left-hand putters up to 48".

For Accurate Markings Use At The Same Level As The Golfer's Feet

Ideal method for determining dynamic lie angles to fit golfers. Special material leaves a black mark on the club's sole (easily removed) to properly interpret required lie angle adjustments.

Magnetic Lie Angle Pointer

Shows how ball flight is misdirected if lie angle is incorrect at impact.

Demonstrates Ball Flight Direction As It Leaves Club Face
